

Hadronic Backgrounds in PERCEVAL

PERCEVAL:

No HCAL Slit, Quadratic Magnet

500K events drawn from 80K Sample (10^9 eot)

No signal-like e^- cut (would be $\mathcal{O}(100)$)

Laney Master's Thesis:

HCAL Slit, Round Magnet

~ 18000 Events signal like e^- (10^{12} eot)
