## Grant Sanderson

Author, mathematics YouTube channel @ 3Blue1Brown

**„Where math and physics collide“**

This talk explores a series of unexpected connections beginning with a simple question of two blocks colliding, where an unexpected occurrence of pi pops up. Understanding what happens involves an unexpected tour through kinematics, optics, and quantum computing, provided a little willingness to dive into the rabbit holes that present themselves along the way.

**Everybody is welcome, especially students of all semesters.**

**Coffee and tea will be available after the colloquium  
in the foyer of the lecture hall.**
